(b) CIA/PID Project C 1785-63

1. In response to your requirement dated 13 December 1963 a search of the area within a 50 nautical mile radius of Pechenga Airfield was performed to determine the existence of ASM electronic facilities on [REDACTED]

3. The attached enclosures delineate the approximate undercast conditions within the search area. The photo quality of [REDACTED] varied from good to excellent within the cloud-free portions, and probably of sufficient quality and scale to negate an ASM electronics facility if it were of the same magnitude as those located at Sary Shagan.

4. The photo analyst on this project was [REDACTED] and he may be contacted on extension [REDACTED] should you have any further questions concerning this project.

5. This project is considered to be complete.
